Who Was Jose /Silva? A Brief Biography

Jose Silva (1914 1999) was a visionary inventor, psychologist, and educator who founded the **Silva Method**, a self improvement system that blends meditation, visualization, and neuro feedback. Born in the small town of San Antonio, Texas, Silva's early fascination with the mind's hidden capacities led him to develop a series of techniques that enable individuals to harness their subconscious power.

His approach, often described as "Mind Control," is rooted in the premise that the human brain operates on multiple frequency bands, and that by consciously shifting into the alpha (8 12 Hz) and theta (4 8 Hz) states, one can access deeper levels of creativity, intuition, and problem solving. Silva's work has influenced a wide array of disciplines, from sports psychology to business management, and has been embraced by thousands of people worldwide.
